

June 22, 2022

Dear CLIMOA member

We are now halfway through 2022 and looking back on quite a successful 6 months so far. We have offered 2 complimentary webinars to our community that have both been very well attended. If you have missed these or would like to have another look - these webinars will be available to our members on the website soon.

We have also made the decision to allow for non-physician membership as from 2023 and are making the necessary changes to our constitution. In addition, we have a subcommittee that is looking into what other changes are required to make our organization as relevant as possible.

We are planning one more webinar in September 2022 and have started the planning for our in-person meeting in the spring of 2023 in Ottawa.

Please feel free to explore our website. The history of insurance medicine is certainly an interesting read, and we have some links to interesting article that may be meaningful to those working in Insurance Medicine.

We would love to hear from you about anything – please send us an email at CLIMOA@unconventionalplanning.com . If you have a colleague working in insurance medicine or even someone who is simply interested in the field, we would love to have them join us. Please provide them with this contact information or guide them to the website.

Until my next communication.....I wish you well!

Antoinette le Roux

(President 2022-2023)
